PHARMACEUTICAL
PROCESSING
EQUIPMENT
NO ONE WILL KNOW YOUR PROCESSING EQUIPMENT LIKE WE WILL!

DETAILS TO FOLLOW . . .

At DCI, our attention to detail has earned us an excellent reputation in manufacturing quality stainless steel vessels for a wide variety of pharmaceutical applications.

DETAIL: PRODUCT

We focus on your high expectations for equipment quality. Before we ever complete your quotation, our design engineers thoroughly evaluate your drawings, vessel application and other technical data. Attention to detail is given to:

- Vessel design and construction
- Material selection
- Product contact surface finishes
- Heating/cooling data
- Other required sanitary components

The result of this thoroughness is product integrity, the assurance the product performs the way you want it to. We'll do it right the first time . . . on time!

We emphasize and deliver the finest custom craftsmanship attainable in stainless steel.

Technical Knowledge
