

Clean-In-Place Agitator

DCI, Inc.'s clean-in-place agitator for storage tanks and vessels.

Time & Labor Savings

No need for manual cleaning of seal shaft and seating surfaces. Eliminates need for daily take-apart after each tank or vessel cleaning

Less Damage to the Tank

Reduces chance of scratching interior surfaces and abrasive scoring of agitator's seating surfaces.

Lower Maintenance Costs

Including more efficient use of equipment and longer sanitary seal life

Improved Quality Control

Cleaned and sanitized seal surfaces result in improved product and longer shelf life

Effective Cleaning

Cleaning solution is filtered and directed through seal and across agitator blades

Reduced Tank Entry

Tank access per OSHA requirements is limited to periodic agitator maintenance
